Joe,

As per the recent EPA request that CDM look for other wells at the Cayuga Site beyond those already inventoried,

I made a retrieval of all wells in the USGS Ground-Water Site Inventory database for the Auburn area .

Only one additional well was found, beyond those wells that have already been inventoried in the Draft Final RI report. This one additional well is a private domestic well on Riester Road about three miles south of Powerex, in the town of Fleming. Thus, I see no significant additional wells in the USGS database that should be added to the RI at this time.
